PROJECT

UTAS RESEARCH DATA PORTAL

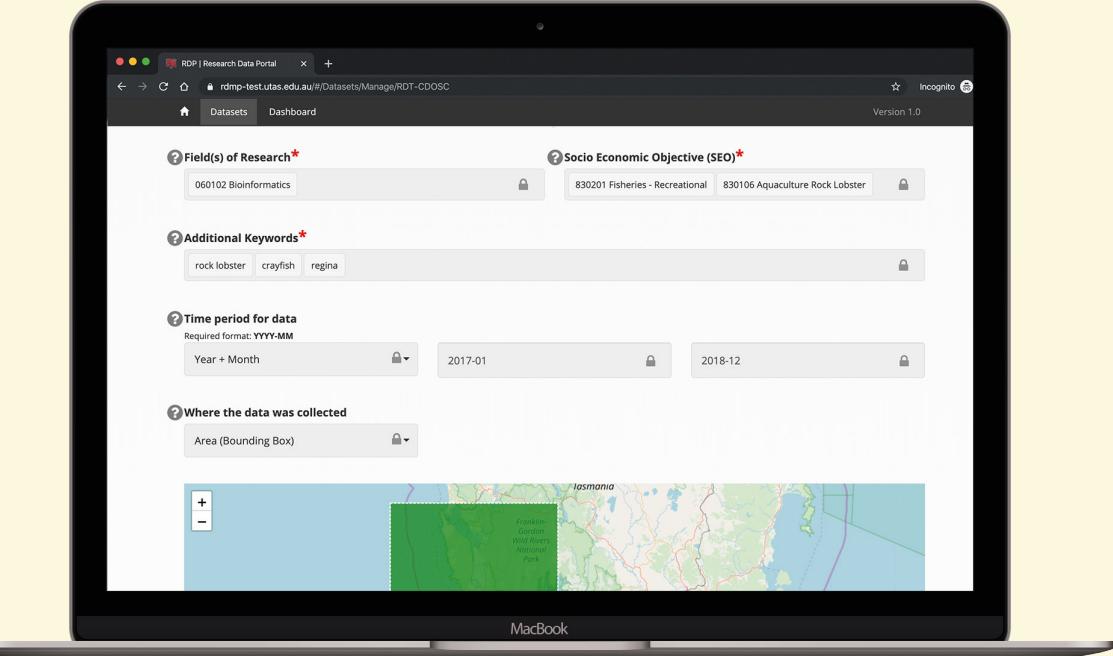

CLIENT

UNIVERSITY of
TASMANIA

IN BRIEF

The first whole-of-university data-publishing application at UTAS, integrating with national research-data-storage infrastructure and international identifier standards, and publishing records to the national research repository.

PROJECT

TERN DATA SUBMISSION TOOL

CLIENT

IN BRIEF

Streamlining the process of capturing metadata for terrestrial ecosystem data in a standard format and prepared it for publication to the TERN Data Discovery Portal.

4. Where

Geographic Coverage

Site description

A descriptive reference for the site locality. May include a project code. Example: Geelong (Site: G145), VIC, Australia

Please input in decimal degrees in coordinate reference system WGS84. Geoscience Australia provide a Grid to Geographic converter

| North limit | West limit | South limit | East limit |
|-------------|------------|-------------|------------|
| -26.725 | 151.200 | -27.316 | 152.052 |

SEAMAP AUSTRALIA

CLIENT

UNIVERSITY OF
TASMANIA

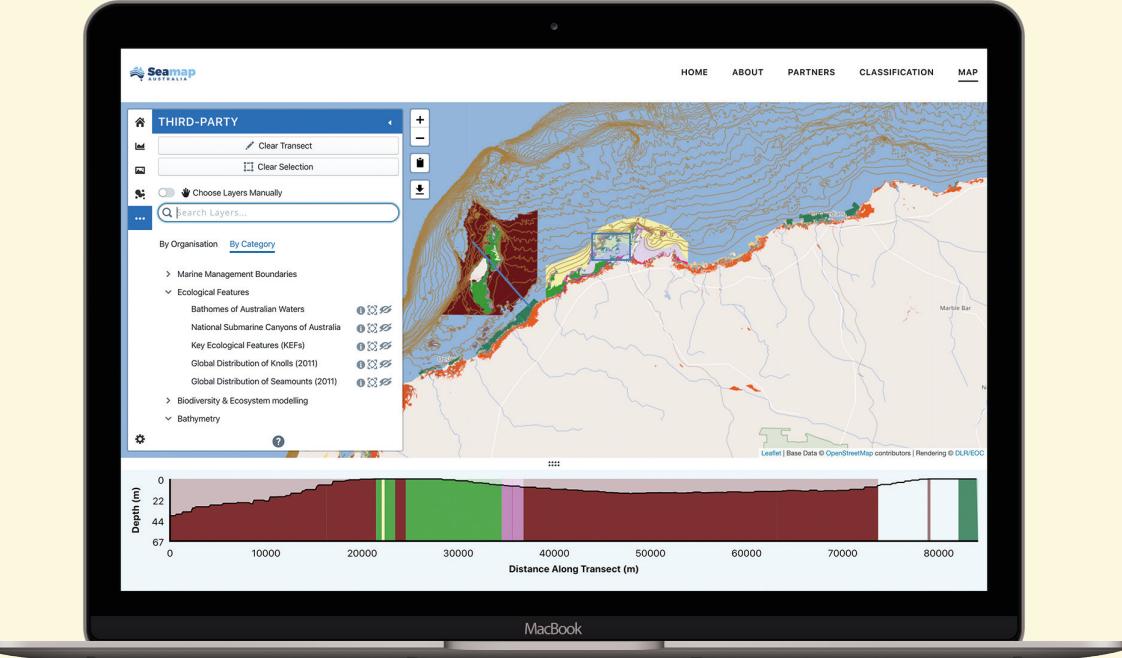

IMAS
INSTITUTE FOR MARINE
& ANTARCTIC STUDIES

IN BRIEF

The world's first continent-scale sea-bed habitat mapping project. The portal brings together data from national seabed mapping collections, making the data discoverable and accessible in one location for scientists, managers, and recreational users to browse and analyse.

IMAS KELP TRACKER APP

CLIENT

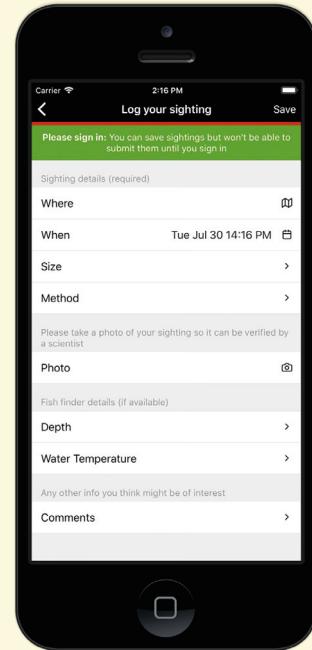

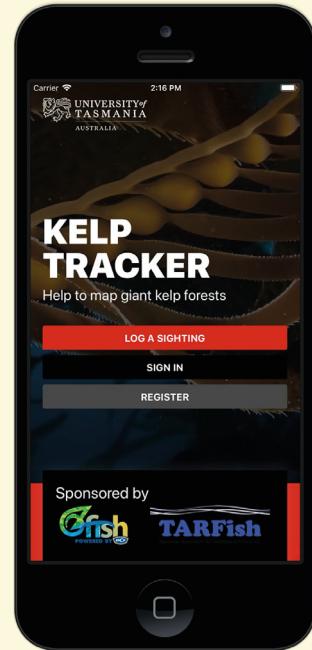

UNIVERSITY of
TASMANIA

IN BRIEF

A citizen-science data collection application to help scientists understand the diminishing giant kelp populations.

AODN DATA SUBMISSION TOOL

CLIENT

AODN
Australian Ocean Data Network

UNIVERSITY OF TASMANIA

IMOS
Integrated Marine Observing System

IN BRIEF

A self-service tool for researchers to submit their research data — simplifying the process of gathering information in a standard format and preparing it for upload to the AODN catalogue and AODN Portal.

The website features a header with the AODN logo, Home, Help, and Sign in links. The main content area has a background image of a ship at sea. It includes a title, a brief description, and a note about acknowledgments. A 'Sign in' button is located at the bottom right of the content area.

FISHERIES SPATIAL AND RESEARCH DATABASES

CLIENT

UNIVERSITY of
TASMANIA

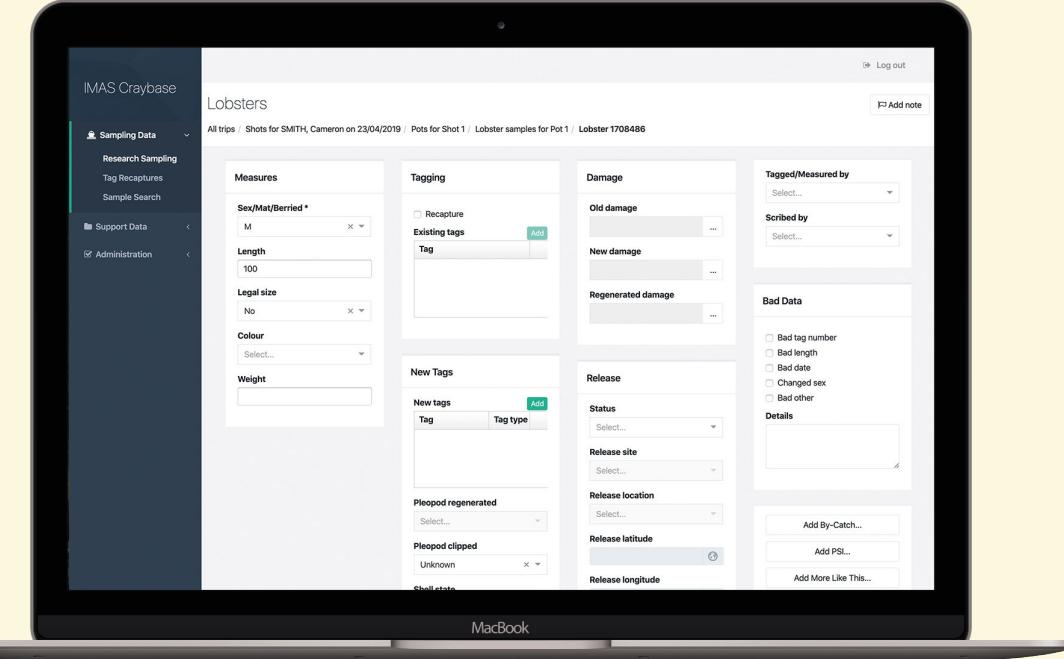

IMAS
INSTITUTE FOR MARINE
& ANTARCTIC STUDIES

IN BRIEF

A suite of custom data-entry applications for numerous research databases including high value commercial fisheries.

IMAS DATA PUBLISHING PLATFORM

CLIENT

UNIVERSITY of
TASMANIA

IMAS
INSTITUTE FOR MARINE
& ANTARCTIC STUDIES

IN BRIEF

A data discovery and access, standards-based cataloguing, and standards-based data serving platform hosting datasets of IMAS researchers, collaborators and partners, including many with national and global interest, across all aspects of the research data management lifecycle.

PROJECT

IMAS DATA SUBMISSION TOOL

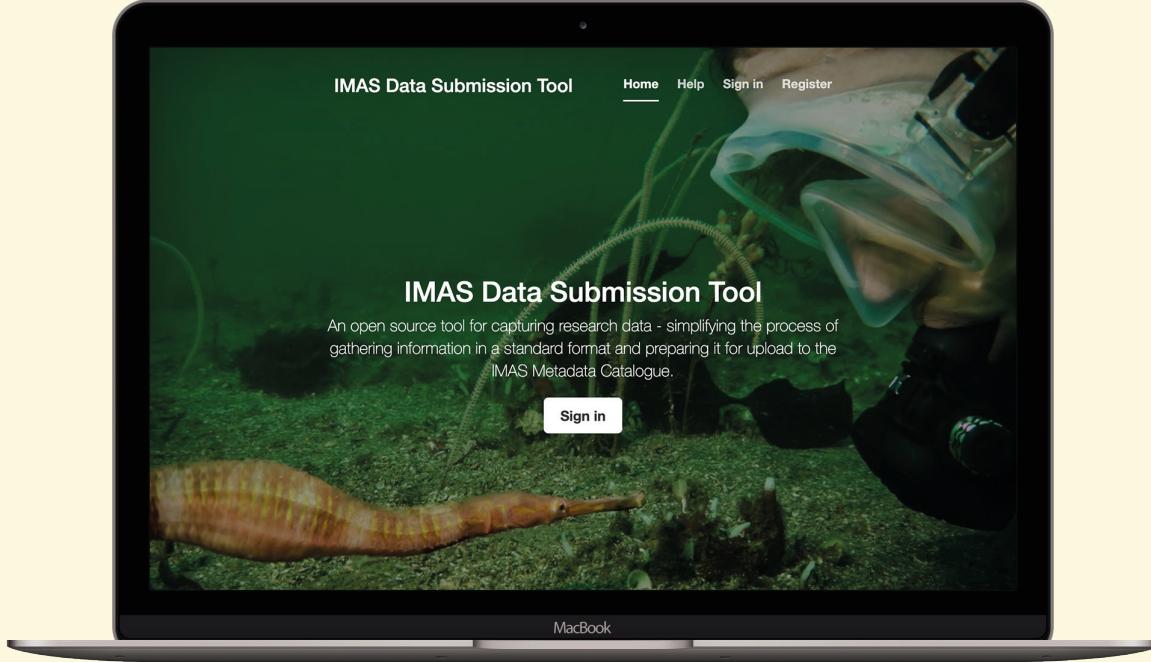

CLIENT

The page features two client logos: the University of Tasmania's red lion crest and IMAS' blue globe logo.

UNIVERSITY of TASMANIA IMAS
INSTITUTE FOR MARINE & ANTARCTIC STUDIES

IN BRIEF

Simplifying metadata entry by researchers and providing workflow to review and publish. This simpler method of entering data records has ensured much greater compliance from researchers who would otherwise be required to wrestle with an unnecessarily complicated interface and standard.

IMAS RESEARCH DATA PROFILE

CLIENT

UNIVERSITY of
TASMANIA

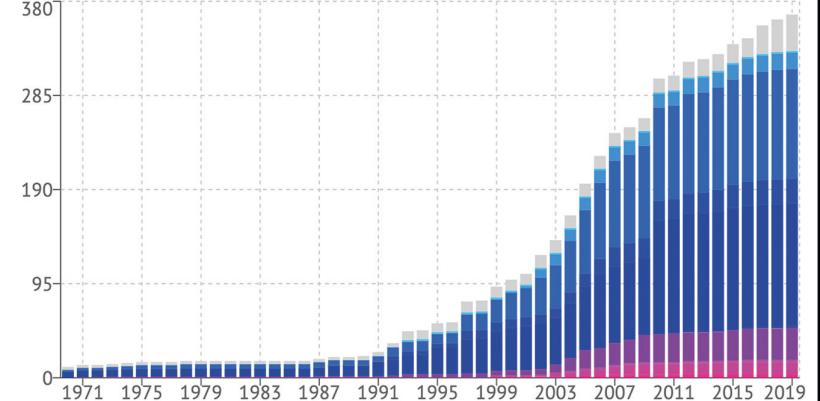

IMAS
INSTITUTE FOR MARINE
& ANTARCTIC STUDIES

IN BRIEF

Visualisations of the research data output by IMAS. Draws information directly from Geonetwork to provide fresh, accurate information.

CUMULATIVE DATA COLLECTION BY YEAR

This graph shows the cumulative number of datasets from IMAS and our collaborators through time.
